

# Sprout Programme Journey

# Day in the Life at Sprout

**10am**

Students will ease into the routine with a debrief, morning meditation, a game to do in their groups as well as a bit of chill time just to chat and catch up with their peers

**10:30 am**

Students will participate in a workshop revolving around the Sprout seeds (topics). These workshops include videos, discussions, group activities and some competitions!

**12:00 pm**

Every Tuesday, there will be a shared lunch. They are encouraged to bring kai from their culture - this celebrates cultural diversity and connect back to their roots.

**12:45 pm**

Every Monday, students will have a short chat with their mentor about their progress and any concerns they have, ensuring the student is supported through the journey.

**1:15 pm**

Students will continue working on their projects in their groups according to their project phase. Their group mentors and advisors will also be giving them guidance.

**4:00 pm**

On Thursday nights, there will be fun events, e.g. gameshow, boardgames, or quiz night. They are for students and staff of Sprout, giving them the chance to mingle with different people.

# Workshop Structure

**Video/lecture (10 min)**

Students will be introduced to the topic and its context through a lesson/video. This section is kept short so that students will retain the topic's key ideas and learnings

**Discussion time (10 minutes)**

This will go hand in hand with the lecture segment. Students will be asked their opinions on the topics so we can gather different perspectives and also collect new insights on the topic.

**Activities (40 minutes)**

There will be 2-4 activities per workshop (with a break in-between). These are interactive and fun ways to action their learnings. The practical aspect helps students grasp and retain the concepts.

**Reflection (5 minutes)**

Students will be given time to reflect on their new learnings by following the facilitator's prompts. Calming music will be played in the background to maintain a relaxed atmosphere.

**Feedback form (2 minutes)**

Students will scan a QR code and complete a quick workshop feedback form. Continuous improvement and iteration are crucial to sprout, ensuring we can grow and further enhance students' experiences for the future.

**Earn a Sprout Card!**

After completing each main seed workshop (growth, diversity, creativity, collaboration, sustainability, challenge), students will earn a collectable card! This will be a souvenir, reminding them of the knowledge and skills gained.
