Inicio

Modelo de accesibilidad a escala humana

Propone relacionar aspectos materiales y experienciales que surgen de la relación del usuario con el ambiente de acceso mediante un modelo de Regresión Logística.

DIMENSIONES

E. COGNITIVO 	INFORMACIÓN	• SEÑALIZACIÓN • COMUNICACIÓN
E. EMOCIONAL 	SEGURIDAD CIVIL Y VIAL	• USOS DEL SUELO • FORMA URBANA
E. FÍSICO 	DISTANCIA, PENDIENTE	• CALIDAD DEL ESPACIO PÚBLICO • CONECTIVIDAD

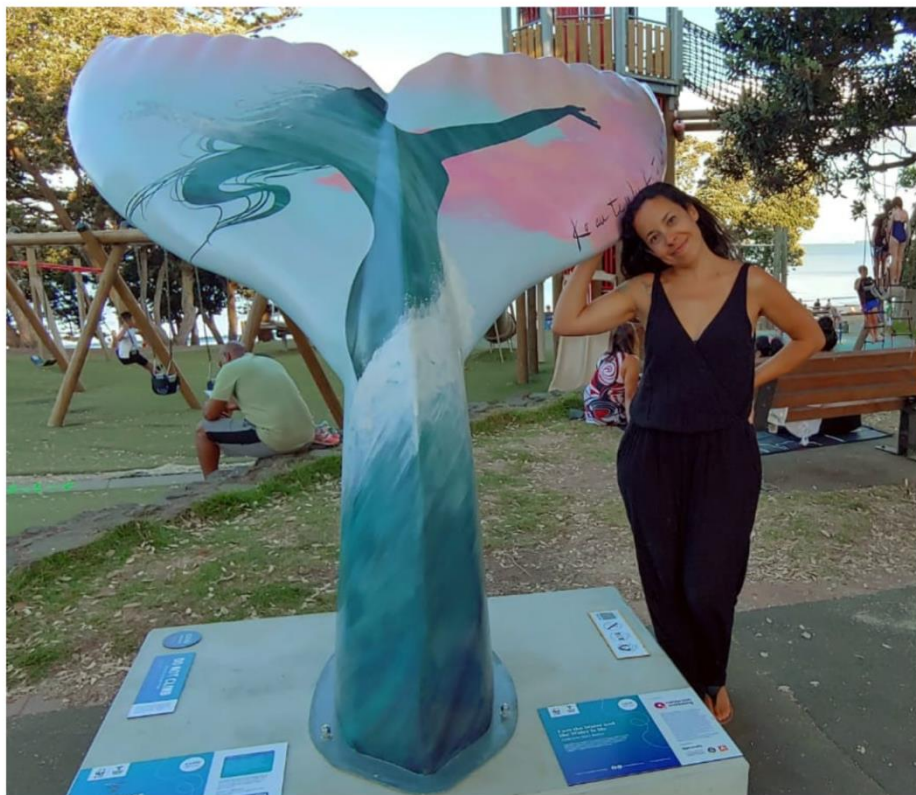

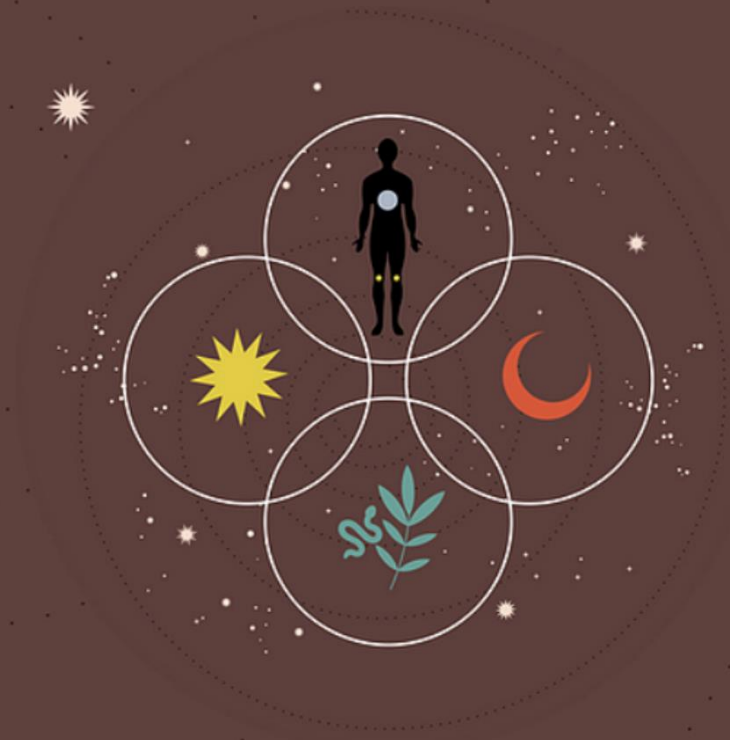

$$f(z) = \ln\left(\frac{p_i}{1-p_i}\right) = \beta_0 + \sum_{j=1}^{k,n} \beta_j X_{j,i}$$

donde,

$f(z)$ es la función logística de acceso peatonal; $\ln$ denota el logaritmo natural; p_i es la probabilidad de que el individuo elija caminar como modo de acceso (puede tomar valores entre 0 y 1 ; éxito = 1); β_0 es la constante del modelo; j es cada variable, i es cada caso observado; β_j es el coeficiente de ponderación para cada variable predictora X_i

**Design for Conservation is a
methodology
that enables collaborative
problem solving
for environmental
conservation and
sustainability challenges.**

I am the environment and the environment is me

A HUI FOR WAHINE ACROSS TE MOANA-NUI-A-KIWA

DATE

Tuesday, April 7

Doors open and refreshments served at 5:00 PM

TIME

5:00 ~ 7:30 PM

5:30 Workshop & discussion starts

LOCATION

Mokupāpapa Discovery Center

70 Kamehameha Ave, Hilo, Hawaii

ABOUT THIS WORKSHOP

This is a celebration of the power we all carry within us.

We are gathering to reconnect to tūpuna knowledge and remember that we are not separate from nature, because we are her. Through the wisdom of Maramataka, the Māori environmental lunar calendar, and its sister the Hawaiian Mahina calendar, we will explore how attuning to the rhythms of the moon cycles can awaken our deepest knowing, restore our sense of belonging to Papatūā-nuku mother earth, and empower us as kaitiaki: guardians and stewards of the natural world.

Four wahine from across Te Moana-nui-a-Kiwa will share mātauranga weaving together Māori, Pacific, Hawaiian and Latin American perspectives on environmental connection, feminine leadership, mana wahine, and the living knowledge that has guided us from within.

OUR SPEAKERS

Ayla Hueta

University of Auckland

Ayla is a wahine Māori and a Maramataka practitioner from Aotearoa. She offers Maramataka guidance grounded in connection to te taiao and the moon phases.

Haunani Miyasato

Kaulana Mahina

Haunani is the founder of Kaulana Mahina, where she creates educational resources and workshops that share the 'ike (knowledge) of the Hawaiian moon calendar.

Dr. Gabriela Baron

University of Auckland

Gabi specializes in participatory and decolonial methods for environmental challenges. She is the creator of the Design+Conservation methodology and works with feminine archetypes for nature reconnection.

Hoku Ka'akuahel Poussina

NOAA

Hoku is a Kānaka Maoli holding space at NOAA, advocating for her ancestors and indigenous peoples to be at the heart of decisions shaping our natural environment and the cultural resources communities depend on.

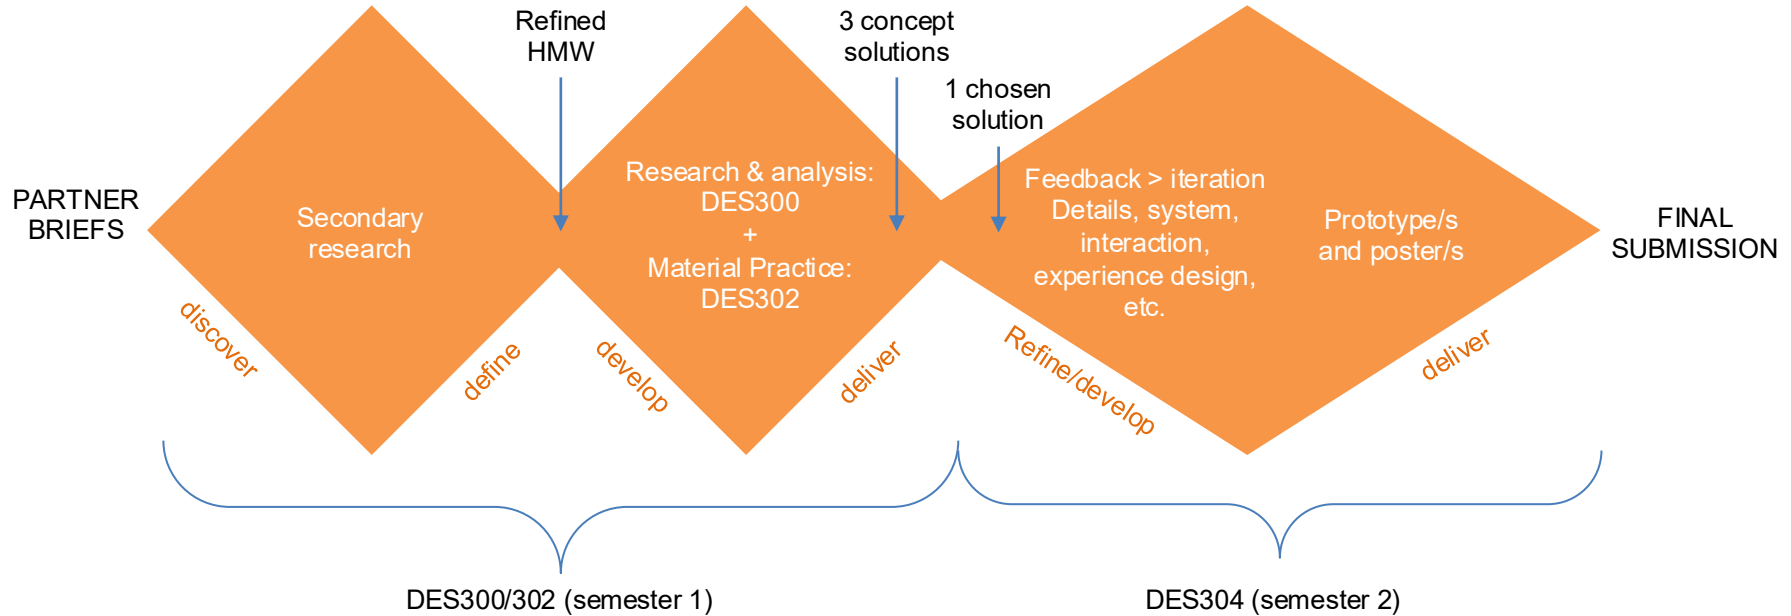

Free event. Refreshments will be served. Places are limited, RSVP essential

The capstone process (triple diamond)

DES300/302/304

The DES300/302/304 process

Expectations: end of S1

At the end of this semester you should have:

- **Background research:** Investigate global and local case studies on the brief topic.
- **Opportunity areas:** Define where design can add value: whether through spaces, experiences, services, systems, community-led programmes, etc.
- **Refined scope:** Narrow the challenge based on your insights (e.g., focus on a stakeholder group, or a specific interaction/experience/service/product, etc)
- **Methodology selection:** Choose and justify an appropriate design methodology (or combination) to investigate, ideate and prototype and test your intervention.
- **Prototyping and communication:** At the end of S1, you should have 3 concept solutions.

Expectations: winter break

During the winter break, you will:

- **Check your 3 distinctive ideas:** they should be
 - **Desirable:** responding to brief requirements and stakeholder groups
 - **Feasible:** prototype-able in the 12 weeks of S2 (and technically feasible in real life).
 - **Culturally sound:** Grounded in place and culture, led by purpose and values

Expectations: Start of S2

You will START Capstone Project ready to:

- **Present to us (end of WEEK 1):** A summary of the topic, background research, Refined scope based on your interests and skills, the Opportunities you have identified within this scope, and your selected methodology, and your 3 concept ideas.
- **Present to the partners (end of WEEK 2):** Your refined HMY Question, the opportunities you have identified within this scope, Your BEST idea (only one), a summary of the background research that supports your idea, and your selected methodology.

Right after, you will be able to:

- **Plan your timeline:** Come up with a structured plan, in weeks, using MIRO, of how you will apply the methodology from problem framing (done in S1) to prototype delivery and presentation at the end of S2.

Quality and Outputs

DES304 | Semester 2

Communicating and Prototyping your projects

Your Capstone project must be **impeccably communicated** through both **visual** and **physical** formats. This means presenting your design in a way that is clear, professional, and appropriate to the type of intervention you've developed.

- **Spatial interventions:** Use appropriate architectural or environmental design language and modelling
- **Digital experiences:** Deliver a functioning digital prototype (e.g. interactive mockup or coded demo)
- **Physical products:** Produce a well-resolved physical prototype
- **Services or systems:** Present the main touchpoints in physical or visual format, and support with service blueprints, journey maps, or scenario storytelling

You'll be expected to research the best ways of communicating your project and **justify your prototyping approach**

Capstone Project Expectations: Impact

All projects must include a plan for measuring their impact. You will be asked to consider:

- Who is affected by your design?
- What kind of change are you aiming for (social, environmental, behavioural, etc.)?
- How can you measure success?

Don't worry — we will teach you methods and tools to support this analysis throughout the course.

Te Āwhiowhio The Coves

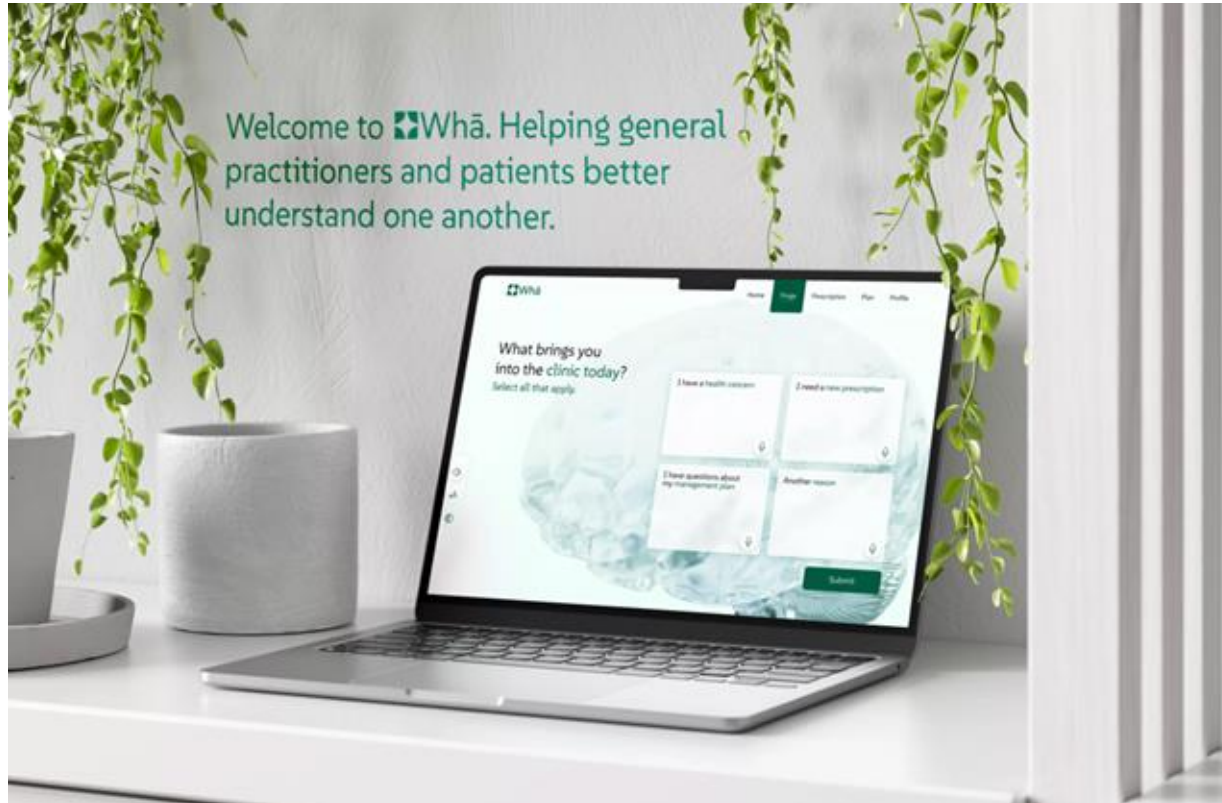

Experience: SeaStar - Clara Schroeder

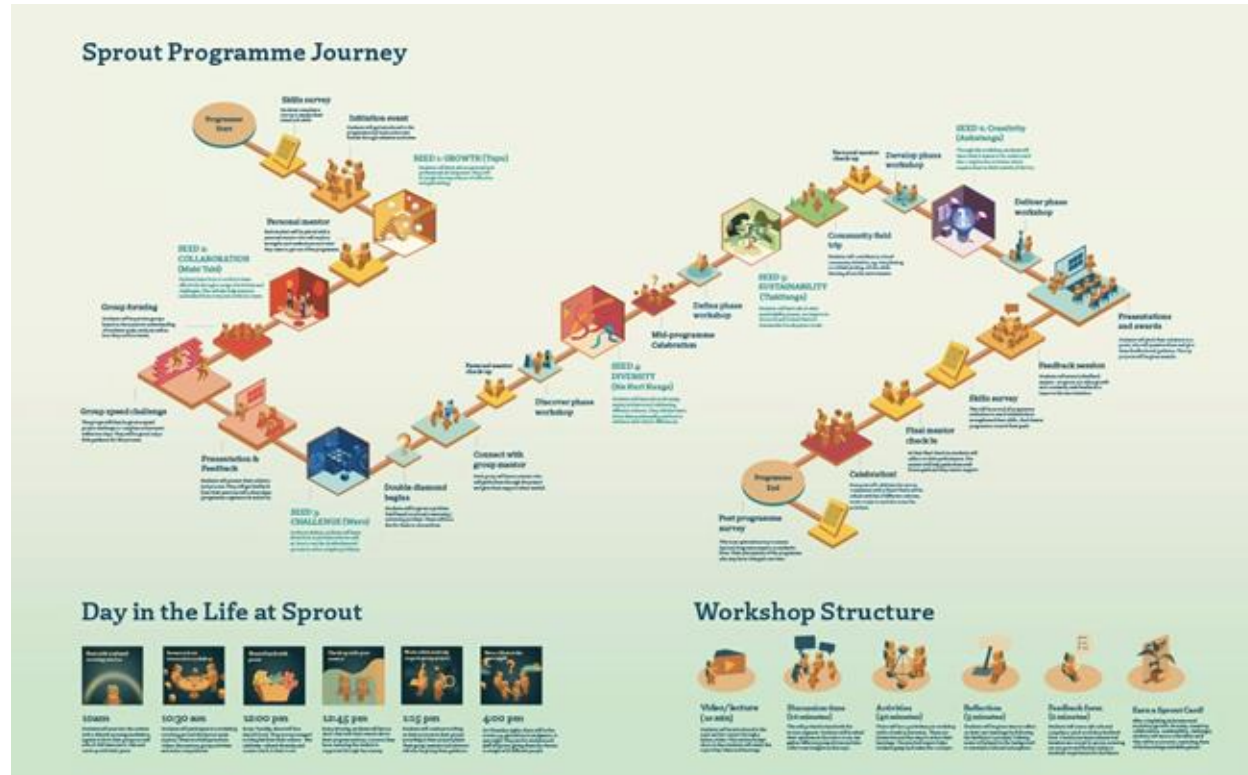

Product/DEI: Raranga - Leah Kampkes

Service/ Digital: Whā - Holly Hogan Murphy

Education/Experience: Sprout - Selena Wu

Experience/DEI: Girls Got Game - Celia Bridge

Storytelling/Conservation: 2050: A biomechanical Ocean - Marco de Kretser

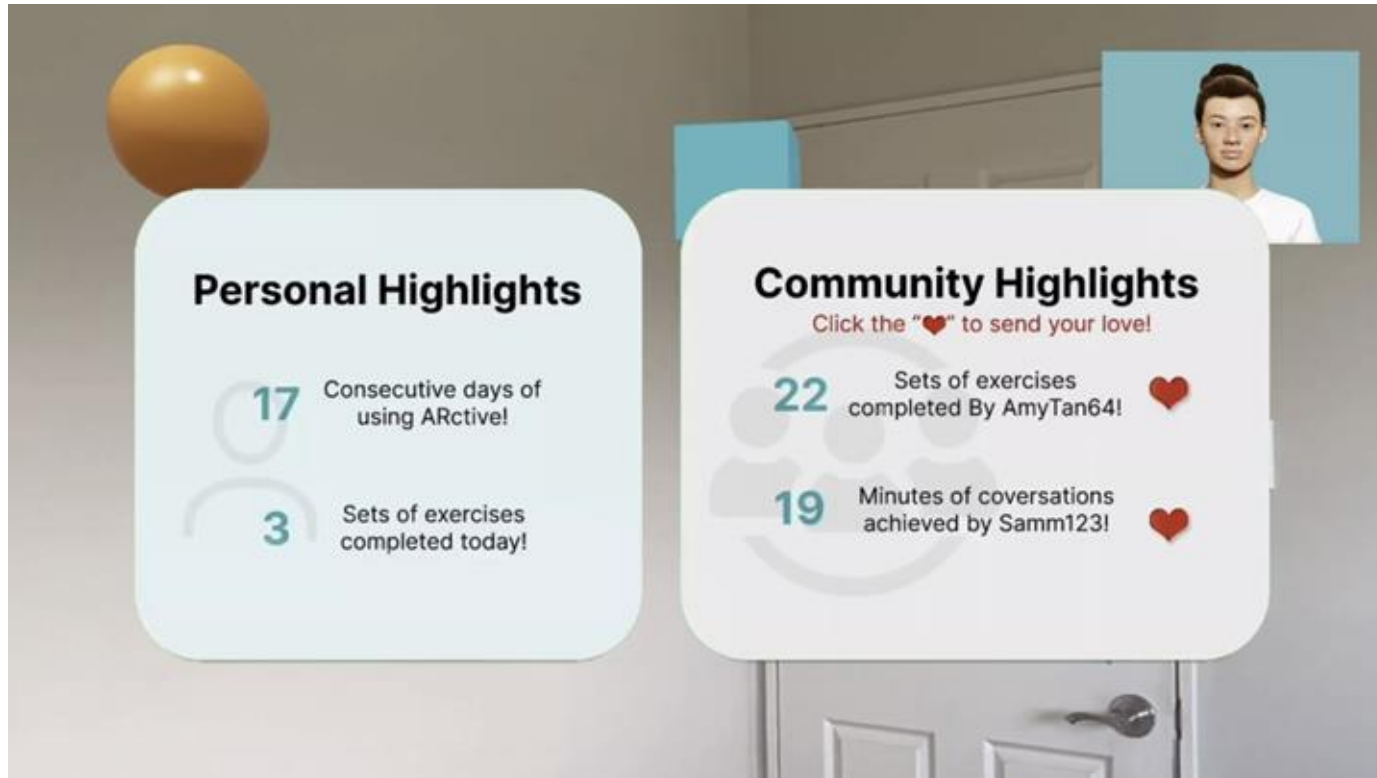

Placemaking/Experience: Te Ara o Waipapa - Siena Thompson

Placemaking/Experience: Wastewater Paradigm - Sun Ming Lee

VR/Wellbeing: VR Active - Fiona Yoon

Next steps

- Read the 4 briefs
- Write down questions
- Attend Week 5 presentations by partners> ask them the questions
- Select your 1st, 2nd and 3rd brief preference (next week)

Questions?

See you next week!
