

DES304

Advanced Design Methods
Capstone Project

Welcome to your last semester!

Haere mai

Karakia

Whakataka te hau ki te uru
Whakataka te hau ki te tonga

Kia mākinakina ki uta
Kia mātaratara ki tai

E hī ake ana te atakura
He tio, he huka, he hau hū

Tīhei mauri ora!

Cease the winds from the west
Cease the winds from the south

Let the breeze blow over the land
Let the breeze blow over the
ocean

Let the red-tipped dawn come with a
sharpened air.

A touch of frost, a promise of a
glorious day.

Agenda

1. Meet your teaching team
2. Introduction to DES304
3. Assessment overview
4. Assignment 1
5. Break
6. Academic integrity
7. Class reps
8. Whanaungatanga with stream leaders

1. Meet your teaching team

2. Intro to DES304

The DES300/302/304 process

The DES300/302/304 process

Expectations: end of S1

At the end of this semester you should have:

- **Background research:** Investigate global and local case studies on the brief topic.
- **Opportunity areas:** Define where design can add value: whether through spaces, experiences, services, systems, community-led programmes, etc.
- **Refined scope:** Narrow the challenge based on your insights (e.g., focus on a stakeholder group, or a specific interaction/experience/service/product, etc)
- **Methodology selection:** Choose and justify an appropriate design methodology (or combination) to investigate, ideate and prototype and test your intervention.
- **Prototyping and communication:** At the end of S1, you should have 3 concept solutions.

Expectations: winter break

During the winter break, you will:

- **Check your 3 distinctive ideas:** they should be
 - **Desirable:** responding to brief requirements and stakeholder groups
 - **Feasible:** prototype-able in the 12 weeks of S2 (and technically feasible in real life).
 - **Culturally sound:** Grounded in place and culture, led by purpose and values

Expectations: Start of S2

You will START Capstone Project ready to:

- **Present to us (This Thursday WEEK 1):** A summary of the topic, background research, Refined scope based on your interests and skills, the Opportunities you have identified within this scope, and your selected methodology, and your 3 concept ideas.
- **Present to the partners (Thursday morning WEEK 2):** Your refined HMY Question, the opportunities you have identified within this scope, Your BEST idea (only one), a summary of the background research that supports your idea, and your selected methodology.

You are also expected to:

- **Plan your timeline:** Come up with a structured plan, in weeks, using MIRO, of how you will apply the methodology from problem framing (done in S1) to prototype delivery and presentation at the end of S2.

Course structure

Workload & commitment

30 hrs/pw

→ (DES304 is a **45 point paper**)

Workload & commitment

30 hrs/pw

→ (DES304 is a **45 point paper**)

- Scheduled Teaching Sessions: There are three 3-hour studio sessions every week (9 hs).
- Self-Directed Time: The remaining hours should be devoted to self-directed homework, reading, research, prototyping, and completing Capstone requirements.

The studio sessions will typically have the following format :

Tuesday 10am-1pm: ALL STREAMS in Design Studios

Main studio session where all staff and students are present. You can expect course-wide announcements and (guest) lectures covering topics that all students/streams need to consider while working on their projects.

- Introductions, lectures, workshops
- Break out into your specific stream groups
- Report to the stream on the week's progress
- 1v1 progress checks with stream coordinators
- Plan and book necessary resources (staff time/technician time)

Thursday 10am -1 pm and 2pm-5pm

Business and Placemaking with Ziyu and Gabi: Design Studios

Technology and Aging with Leo and Juhri: MG studios (ELAM)

Weekly format

*All streams
together*

Tuesdays (10-1pm)

General info, Lectures,
Standup's and checkin's
with your stream leader

Assessment structure

Assessment structure

Course Schedule Semester 2 2026

Week / Date	Tuesday (all streams)	Thursday (stream specific)	Assessment (all streams)
Week 1 begins 20 Jul	- Intro to course and assessments, housekeeping, Q&A - Intro to Assignment 1 - Whanaungatanga	All streams: Compulsory check-ins and prep for partner pitches (morning session)	
Week 2 begins 27 Jul	- How to pitch a project - Pitching practice by streams	Partner pitches (A1) morning session	A1: PITCH PRESENTATIONS with partners (10%) all streams
Week 3 begins 3 Aug	Nick/Juhri: Positionality workshop (A1)	Stream supervision sessions	Positionality workshop (2.5%)
Week 4 begins 10 Aug	- Leo/Ziyu: Rapid Prototyping - Working with the Design Lab - Workshop: Prototyping with AI (A1)	Stream supervision sessions	Compulsory attendance (graded 2.5)
Week 5 begins 17 Aug	Guest lecture by AUDDO: Placemaking and Communicating place-based projects (confirmed)	Stream supervision sessions	
Week 6 begins 24 Aug	Guest Lecture by Co-Create Age: Universal and inclusive design	Stream supervision sessions	

Mid-Sem Break begins 1 Sept			
Week 7 begins 14 Sept	- Leo: Final Presentations & Showcase info session - A3 submission expectations - Submission plans draft	All streams: Compulsory check-ins (morning session)	A2. Compulsory check-in (5%) all streams
Week 8 begins 21 Sept	- Gabi: Impact Planning and Measuring lecture - Workshop for impact planning (A2)	Stream supervision sessions	Impact planning workshop (2.5%)
Week 9 begins 28 Sept	- Ziyu: Sustainable Material Selection and Life Cycle Thinking - Workshop for Smart Material Choices (A2)	Stream supervision sessions	Materiality workshop (2.5%)
Week 10 begins 5 Oct	Design Graduates: Career and employability services info session	Stream supervision sessions	
Week 11 begins 12 Oct	Poster making lecture and workshop	All streams: Poster development sessions	A3. Posters due (10%)
Week 12 begins 19 Oct	Free flow check-ins and Q&As	A3 Final oral presentations (prototypes and report submission) Thursday morning by stream.	A3. Final presentations (65%) with partners
Week 14 begins 2 Nov	ReDesign Showcase set up	ReDesign Showcase (Friday 6 & Saturday 7 November)	

REDESIGN

THE UNIVERSITY OF AUCKLAND
DESIGN PROGRAMME

Questions?

3. Assessment Overview

Learning outcomes

1. Activate and customise key methodologies and design tools, and develop new ones applicable to design research and capstone development.
2. Frame and reframe a research question based on observation, evidence and evolving insight and understanding.
3. Iteratively develop a capstone design project while documenting the process and its evolution through successive prototypes and reflections.
4. Demonstrate ability to engage in and activate a local design context.
5. Demonstrate ability to present a project to an advanced level and to provide contextual and critical review in response to peer projects.

4. Assignment 1

A1 : Project management

Build a foundation & roadmap for the next 12 weeks.

Plan for success!

But also be prepared to modify
that plan as your project ventures
into uncharted domains.

A1 : Project management

Introduction

This assignment requires refining your design proposal from Des300, focusing on the design methods and tools you selected, and weekly planning that outlines self-prescribed major and minor milestones alongside weekly deliverables/tasks that incrementally progress you towards your final project and presentation (Assignment 3).

It is important to note that the output from this assignment (a self-built Miro board) will remain as a live document for the remainder of the semester. You will continue using this Miro Board for progress checks

Translate your design process into a weekly project plan

Define weekly task and follow up in studio with peers/GTAs

- Weekly "to-do-list" based on your weekly project planning.
- Evidence of the planned tasks during studio time.
- Engage in studio culture by reporting to the class and your stream leader.

A1 : Project management

6 key “ingredients”

1. “To-do-list” weekly tasks section for studio follow-up.
2. Define the specific design process you wish to use and map the stages defining methods and tools to a timeline.
3. Include and update the preliminary research from Des300
4. Define an achievable scope/boundary of your project.
5. Build a project-specific timeline for the remainder of the semester.
6. Include a section for reflection about cultural considerations and positionality

A1 : Concept pitch (oral presentation)

You will prepare a pitch deck to present orally during the tutorial.

You will have 3 minutes to present and 2 minutes for feedback.

Your presentation should -at some point - answer the following questions:

- **Why?** Why do we care?, Why is this a problem that needs solving? Background of the selected challenge: Use research data to support your points. You can use this space to introduce your refined HMW question.
- **What?** What is your proposed project/solution? What does it look like (concept-level hero shots)?
- **Who?** Who are the stakeholders most affected/benefited? Who is your target audience? Why would they participate in this (motivation)?
- **How?** How does your proposal work? Does it have steps? How would participants engage? Provide concept-level technical aspects or and a system map/storyboard.

A1 : Deliverables

1. Upload your slide deck. **Please name your file as: Stream_YourName.pdf e.g. Placemaking_JaneSmith.pdf**

Tips: Make sure your slides are highly visual, and provide the most important info in writing, but do not make them text-intensive. Do not use "Canva" type of decorations for your slides; only use images that are highly pertinent to your project.

2. Deliver an oral presentation. *Tips: Start by introducing yourself. Do not read from your phone or from a script. You can use the slides as a visual help to keep the pacing, but try not to read from the slides. Face the audience, making eye contact. Remember that partner feedback will be highly valuable to make the rest of the project a success.*

3. Project management: Deliver a PDF image (Printed from your Miro board) of your project management plan. *This should be structured as a timeline that maps your methodology, main milestones, tasks, and deliverables across the 14 weeks of semester 2.*

4. Copy and paste your project's Miro Board link - make sure it's accessible by all tutors (permissions)

A1 : Marking Rubric

Criteria	Ratings				Pts
Oral presentation The oral presentation clearly articulates the challenge/problem and how the proposal addresses it in a professional/engaging way (clear speaking, facing the audience, not relying on notes). It is within the specified time limit.	2.5 to >2.0 Pts Excellent The oral presentation was clear, effective, compelling and professional.	2 to >1.5 Pts Good to Very Good The oral presentation was very good with some room for improvement.	1.5 to >1.0 Pts Adequate The oral presentation was adequate with much room for improvement.	1 to >0 Pts Inadequate The student did not present orally.	2.5 pts
Visual communication Slides demonstrate strong visual communication competencies (typography, size, diagrams). Hero shots are compelling and help communicate the concept-level solution.	2.5 to >2.0 Pts Excellent It demonstrates strong visual communication competencies in alignment with the proposal's style and topic.	2 to >1.5 Pts Good to Very Good It somehow demonstrates visual communication competencies in alignment with the proposal's style guide and topic.	1.5 to >1.0 Pts Adequate It shows poor visual communication competencies or is not alignment with the proposal's style and topic.	1 to >0 Pts Inadequate Did not use slides.	2.5 pts
Concept-level proposal The concept proposal responds to the brief effectively. The overarching HMW question has been adequately scoped and refined. The proposed idea has been informed by secondary research. Project timeline and Miro board have been submitted. The proposal is desirable, viable, and feasible for this Capstone project.	5 to >4.0 Pts Excellent Excellent concept-level proposal, clearly aligned to the stream brief, it is desirable, viable, and feasible within the Capstone timeframe.	4 to >3.25 Pts Good to Very Good Good to very good concept-level proposal, clearly aligned to the stream brief, it is desirable, viable, and feasible within the Capstone timeframe.	3.25 to >2.5 Pts Adequate Adequate concept-level proposal, aligned to the stream brief. The proposal will need refining to be desirable, viable, and/or feasible within the Capstone timeframe.	2.5 to >0 Pts Inadequate Inadequate concept-level proposal and/or not aligned to the stream brief. The proposal will need significant refining to be desirable, viable, and/or feasible within the Capstone timeframe.	5 pts

6. Academic Integrity

Kawa

INSPIRED IN:

Mason Durie - Whare tapa wha
<https://www.health.govt.nz/our-work/populations/maori-health/maori-health-models/maori-health-models-te-whare-tapa-wha>
Rose Pene - Te Wheke

(Whaanau) Whanaungatanga at the centre

1. (noun) relationship, kinship, sense of family connection - a relationship through shared experiences and working together which provides people with a sense of belonging. It develops as a result of kinship rights and obligations, which also serve to strengthen each member of the kin group. It also extends to others to whom one develops a close familial, friendship or reciprocal relationship.

<https://maoridictionary.co.nz/word/10068>

Academic Integrity

Why academic integrity is important:

- Academic integrity is the honesty that you have in your studies and assessments. It is a key foundation to being a member of the University's academic community.
- Having academic integrity shows that you respect the work of other people, such as their Ideas, Words, Image, Code
- Breaching academic integrity leads to penalties and consequences, e.g. damaged reputation.

NEW ZEALAND

Engineer suspended after signing off on unsafe tuk-tuks

NZ Herald

Academic Integrity

- Academic misconduct may happen in coursework and exams.
- Examples: inadvertent plagiarism, collusion and contract cheating.
- Revisit the online Academic Integrity Course, ACADINT A01.
- Read more information about academic integrity
- If you're unsure you're meeting academic integrity, don't be afraid to ask for help from lecturers and/or course coordinator.

... / [Student policies and guidelines](#) / [Academic integrity and copyright](#) / [About academic integrity](#) +

About academic integrity

Find out what academic integrity is and why it's important for your studies.

Ethics

- Work with your **peers** to **test ideas** (interviews, surveys, focus groups, talanoa, workshops, to mention some). *Develop your skills!*
- **Informal** and **non-documented** talks with your family and friends.
- **Talks with project partners** (these can be documented and photographed).
- Field trips: Record **images** of places **without recognisable people**
- Create **personas** or avatars based on secondary data and your experiences. *Be careful with biases and stereotypes!*

- **Don't** use our **course** to “**formally**” **access people** and places without our consent.
- **Don't use** your family and friends **without** thinking about **reciprocity**. They are giving you their time and knowledge, be grateful.
- **Don't record** people **without consent** (not only in this class!)
- Creating fictional characters or **personas doesn't substitute people and communities!** Understand that this is only a course exercise.

AI Usage in Assessment

Academic Honesty Declaration

This is a Lane 2 assignment completed under uncontrolled conditions.

You are allowed to use AI to assist in the development of your assessment. However, any use of such tools must be acknowledged appropriately. For guidance on referencing AI-generated content, visit [QuickCite](#) .

By completing this assessment, I agree to the following declaration:

I understand the University expects all students to complete coursework with integrity and honesty. As a member of the University's student body, I will complete this assessment in a fair, honest, responsible and trustworthy manner.

This means that:

- I declare this is my own work and have acknowledged all sources, including texts, images, datasets, templates, code and any AI or permitted third party contributions.*
- I am aware the University of Auckland may use plagiarism detecting methods to check my submission.*
- I declare that this work has not been submitted for academic credit in this course or another University of Auckland course, or elsewhere.*
- I acknowledge that I have adhered to the assignment brief surrounding the use of permitted materials, software and third party assistance.*
- I understand the University expects all students to complete coursework with integrity and honesty.*

Any breach of this statement or identified academic misconduct will be followed up and may result in disciplinary action

The Two Lane Approach

Lane 1: Controlled

- Completed under controlled conditions.
- AI is restricted by default.
- Any permitted AI tools must be clearly named in the assessment brief.
- Examples: exams, tests, interactive oral assessments.

Lane 2: Uncontrolled

- Completed outside controlled conditions.
- AI may be used without restriction.
- You must still acknowledge AI, sources, and permitted third-party contributions.
- Examples: designs, essays, posters, peer reviews, reflections.

Always check the Assessment page and the specific assignment page before you start.

Acknowledging AI Use

The Academic Honesty Declaration still matters

- By submitting, you declare that the work is your own and **all sources are acknowledged**.
- This includes texts, images, datasets, templates, code, AI, and permitted third-party contributions.
- You confirm the work has not been submitted for credit elsewhere.
- You acknowledge the assignment brief and the University's academic integrity expectations.

Lane 2 means AI is allowed, not invisible.

Example

Figure 1. Finding the best evidence in the library

Note. Image generated using the prompt "Illustrate how to find the best evidence in a library. Do not include any people". DALL-E 3 (OpenAI), 2026.

Reference list

OpenAI. (2026). DALL-E through ChatGPT [text-to-image model]. <https://chatgpt.com/>

7. Class reps

**Your voice
helps
shape
positive
change**

Class rep nomination & voting (TBD)

See announcement on Canvas

8. Whanaungatanga (in streams)

The background of the slide is a microscopic image showing cellular structures, possibly a leaf cross-section, with various green and yellowish areas. A large, semi-transparent white rectangular overlay covers the majority of the image, providing a clean background for the text.

Who are you and **why are you here?**

Share **something that you like about yourself**

Thank you!
