Final Oral Presentation

You will present your final project to your peers, teachers, and project partners. You will have 4 minutes to present and 2 minutes for feedback.

Your presentation should answer the following questions:

- **Why?** Why do we care?, Why is this a problem that needs solving? Background of the selected challenge: Use research data to support your design process.
- **What?** What is your proposed project/solution? What does it look like?
- **Who?** Who are you? Who are the stakeholders most affected/benefited? Who is your target audience? Why would they participate in this (motivation)?
- **How?** How does your proposal work? Does it have steps? How would participants engage?
- **Impact:** What are the social/cultureal/economic/environmental impacts that you expect your project to have.

Deliverables

1. Upload your slide deck. *Tips: Make sure your slides are highly visual, and provide the most important info in writing, but do not make them text-intensive. Do not use "Canva" type of decorations for your slides; only use images that are highly pertinent to your project.*

2. Deliver an oral presentation. *Tips: Start by introducing yourself. Do not read from your phone or from a script. You can use the slides as a visual help to keep the pacing, but try not to read from the slides. Face the audience, making eye contact. Remember that partner feedback will be highly valuable to learn from your Capstone experience.*

3. *You will show your prototype during this presentation (but you do not need to upload anything here).*
