

A3. Prototype

[Start Assignment](#)

- Due 29 Oct by 23:59
- Points 15
- Submitting a text entry box, a website url, a media recording, or a file upload
- Available after 21 Jul at 0:00

Prototype

Iterative prototyping is a vital part of any design and research process. It allows you to turn your ideas and sketches into tangible formats that can be used for communication, testing, critique, and validation.

The format of your prototype should be discussed and agreed upon with your stream leader. Even if your project focuses on an intangible outcome—such as a service or system—you are still expected to produce a physical prototype. This might be a key touchpoint within the user experience or take the form of a model that helps convey your concept, such as an architectural or interaction model.

Prototyping is inherently iterative. You will likely produce multiple versions, with each iteration building on insights gained from the last. Begin prototyping early and plan for multiple rounds of development. Early versions might include low-fidelity or "paper prototypes" that clearly show how you're refining your concept through self-directed research and feedback.

Your **Visual Project Report** must include documentation of your prototyping process—such as sketches, photos, and other visuals—to clearly communicate how your project evolved.

For your **final presentation and Design Exhibition**, you will be required to produce a **high-fidelity prototype** that represents your refined design outcome.

Deliverables

Format TBC with your stream coordinator.

Use this space to upload a functioning QR code or link (if you have one or a specific prototype document), or images of your physical prototype, etc.

1. Include all "Paper" prototypes (or wire-frames if digital) - documented in your final Visual Project Report.
 2. Hi-Fidelity final prototype (digital or physical) - to be presented live alongside the final pitch presentation.
-

Academic Honesty declaration

This is a Lane 2 assignment completed under uncontrolled conditions.

You are allowed to use AI to assist in the development of your assessment. However, any use of such tools must be acknowledged appropriately. For guidance on referencing AI-generated content, visit [QuickCite](https://auckland.libguides.com/referencing-generative-ai-tools)  (<https://auckland.libguides.com/referencing-generative-ai-tools>).

By completing this assessment, I agree to the following declaration:

I understand the University expects all students to complete coursework with integrity and honesty. As a member of the University's student body, I will complete this assessment in a fair, honest, responsible and trustworthy manner.

This means that:

- *I declare this is my own work and have acknowledged all sources, including texts, images, datasets, templates, code and any AI or permitted third party contributions.*
- *I am aware the University of Auckland may use plagiarism detecting methods to check my submission.*
- *I declare that this work has not been submitted for academic credit in this course or another University of Auckland course, or elsewhere.*
- *I acknowledge that I have adhered to the assignment brief surrounding the use of permitted materials, software and third party assistance.*
- *I understand the University expects all students to complete coursework with integrity and honesty.*

Any breach of this statement or identified academic misconduct will be followed up and may result in disciplinary action.

DES304.2026.A2 Prototype

Criteria	Ratings				Pts
Resolution and Format The final prototype effectively translates key ideas into a tangible form. The format is well-chosen and carefully considered for public display.	7.5 to >6.0 Pts Excellent The prototype is compelling as a translation of key ideas, conceptually coherent, and very well-considered for public display.	6 to >4.88 Pts Good to Very Good The prototype is a clear translation of key ideas, conceptually coherent, and well-considered for public display.	4.88 to >3.75 Pts Adequate The prototype provides some translation of key ideas, and is adequately considered for public display.	3.75 to >0 Pts Inadequate The prototype does not clearly translate key ideas, and has not been adequately considered for public display.	7.5 pts
Technical Execution The final prototype has been fabricated using appropriate technology, tools, and materials. It demonstrates exceptional attention to detail and craftsmanship.	7.5 to >6.0 Pts Excellent Technologies, tools, and materials are highly appropriate for the prototype and the context of the project. The work demonstrates an excellent level of craftsmanship and attention to detail.	6 to >4.88 Pts Good to Very Good Technologies, tools, and materials are appropriate for the prototype and the context of the project. The work demonstrates a good to very good level of craftsmanship and attention to detail.	4.88 to >3.75 Pts Adequate Technologies, tools, and materials are partially appropriate for the prototype and the context of the project. The work demonstrates an acceptable level of craftsmanship and attention to detail.	3.75 to >0 Pts Inadequate Technologies, tools, and materials are not appropriate for the prototype or the context of the project. The level of craftsmanship and attention to detail is inadequate.	7.5 pts
